

CSCI 3308 Milestone 4

Team Number: 08

Team Name: Team T33am

Team Members: Sam Basile, Maya Greenstein, Zhanchao Yang, Max Page

Application Name: Draw Chat™

Project Features List

- **Drawing**

Drawing on a canvas with a variety of colors with the ability to undo, redo, and clear the canvas. There is a drawing tool and an eraser. Chat input and box ready to be connected to a backend.

- **Sign On**

Home page and sign on feature completed. Need to connect to nodejs to store usernames in the database.

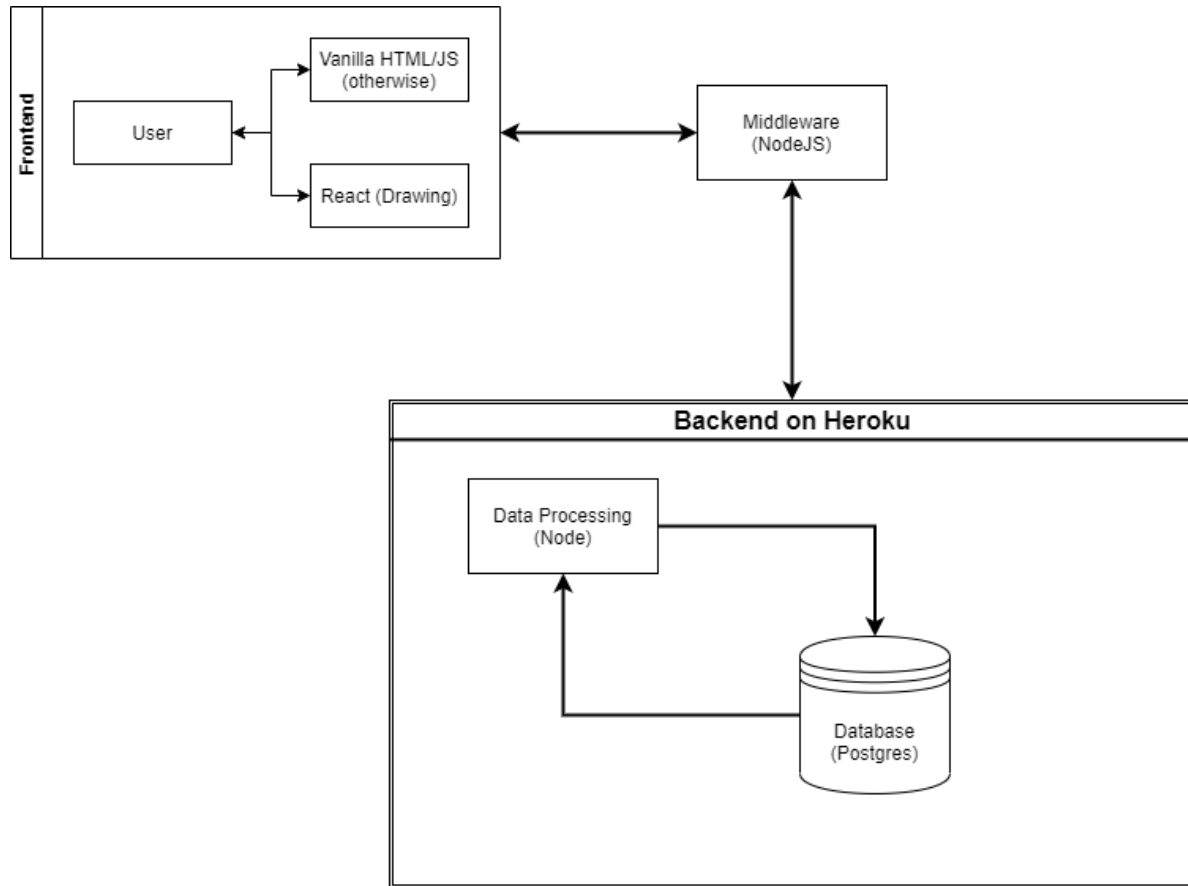

- **Score Counter/Timer**

Score function is complete based on time, a countdown timer is complete . Refreshing the page should not reset the timer, so it needs to change that. It need to store each player's time in the backend, store in (database)

- **Guessing**

Guessing page completed that continuously takes in an image and displays it. This page includes a form where users can input their guesses. Upon submission of the form, the form will be reset. If the guess was incorrect, it will be added to a list of previous guesses below the form. If the guess is correct, the timer will be stopped and all users will be brought to a new page (specific page is dependent on their current role).

|-------|-----|
| User1 | 0 |
| User2 | 820 |
| User3 | 560 |

Web Service Design

N/A - we will not be using an API for our application.

Database Design

Challenges

1. Exporting SVGs at a steady rate, uploading to the database, and sending to the other users pages.
2. Adding timer and scoring to the other pages and saving scores dynamically in the database.
3. Saving SVGs in postgres database.

Challenge Mitigation

1. All of our challenges have been validated as feasible by TAs, so if we are unable to overcome them ourselves, we will get help from TAs

Individual Contributions

| Name | Github commit link | Contributions |
|-----------------|---|---|
| Maya Greenstein | commit | Completed wireframe design, helped with ER diagram |
| Sam Basile | All of the commits on the canvas branch. One Commit. | Drawing canvas, chat box/input, color picker |
| Max Page | https://github.com/sambasile10/TeamTT/tree/max | Database design, connecting functions design, preliminary sql |
| Zhanchao Yang | link | Preliminary challenge, ER diagram |

Milestone 5

Almost Done

MP

MG

SB

ZY

Epic ▾

TO DO 4 ISSUES

Add timer and scoring function to pages

INTEGRATION

 TT-50

Connect home pages to guessing and drawing pages

INTEGRATION

 TT-51

Give 'start game' button functionality

BACKEND

 TT-53

GET and POST functions for communicating data dynamically

 TT-56

IN PROGRESS 3 ISSUES

Create game code page

FRONTEND

 TT-52

Function to store react SVGs in database and post guessing page

INTEGRATION

 TT-55

Create Game Code table for database

BACKEND

 TT-54

DONE ✓
