Project Ideas:

- Crypto Advice App - query advice from the internet and use some type of phrasing to give the user the "best" possible advice all cloud service
- Hug App - add friends with the ability to send 'hugs' which gives the receiving user a push notification - all cloud
- Enterprise Calendar App with reminders - create calendars for companies, sync data - locally host (with cloud backup?)
- Drawing guessing game - picture style game where a group is created and image data is synced between users so they can guess what the image is - all cloud service
